	Hole Diameter		Head Thickness	Head Width	Major Diameter	
	Max	Min	Ref	Ref	Max	Min
1/4 - 14	.220	.180	.080	.385	.246	.240

Description	An externally threaded fastener with a spaced thread pattern, tapered point, an an integrally formed circular shoulder (which can have a serrated bottom surface). Above the shoulder is an unthreaded section of shank that flattens at the top end of the screw. In the middle of the flattened "head is a hole.
Applications/ Advantages	Designed specifically for attaching drop ceiling tie wires to wood.
Material	AISI 1022 or equivalent steel
Plating	Acoustical lag screws are typically supplied with plain finish.
